BARRIER II

SANITIZER-DISINFECTANT-VIRUCIDE

FEATURES

- CONCENTRATED FORMULA
- VERSATILE USE DILUTIONS USE AS A SANITIZER OR DISINFECTANT

PRODUCT DESCRIPTION

BARRIER II is a no-rinse quaternary sanitizer which can be safely used on all washable surfaces and is approved as a final sanitizing rinse for food equipment surfaces. Designed for use in hospitals, nursing homes, hotels, schools, restaurants and bars where disinfection, sanitization and deodorization is of prime importance. **BARRIER II** has demonstrated effectiveness against viruses similar to 2019 novel coronavirus (SARS-CoV-2) on hard, non-porous surfaces. Therefore, this product can be used against SARS-CoV-2, the novel coronavirus that causes the disease COVID-19, when used in accordance with the directions for use against Adenovirus Type 5 on hard, non-porous surfaces. Refer to the CDC website (https://www.cdc.gov/coronavirus 2019-ncov/index.html) for additional information. **BARRIER II** exhibits effective virucidal activity against HIV-1 (Human Immunodeficiency Virus Type 1), Hepatitis B virus (HBV), and Hepatitis C virus (HCV) when used at 3.5 ounces per 5 gallons of water.

AREAS OF USE

3rd tank sink (sanitizing sink). Hard, non-porous surface sanitizing or disinfecting.

TRIPLE SINK USE DIRECTIONS

Fill 3rd sink (sanitizing sink) at a rate of 1.5 oz. per 6 gallons. This will require a green activator or continuous flow depending on the size of sink.

HARD, NON-POROUS SURFACE USE DIRECTIONS:

To Sanitize Pre-Cleaned Surfaces: Prepare a use solution of BARRIER II by adding <u>1-2 oz of BARRIER II per 4 gallons of water</u>, Apply solution with cloth, sponge, or trigger sprayer, making sure that all surfaces remain wet for at least 60 seconds and let air dry. Do not rinse.

Disinfection: Add <u>3.5 oz of **BARRIER II** per 5 gallons</u> of water to disinfect hard, non-porous surfaces. Apply solution with cloth, sponge, or trigger sprayer, and wet all surfaces thoroughly. Allow to remain wet for 10 minutes. **BARRIER II** can be used against SARS-CoV-2, the novel coronavirus that causes COVID-19.

If disinfecting food contact surfaces, a fresh water rinse is required after the 10 minute contact time.
